Wall Mount Occupancy Sensor				\$14.00	\$0.00	-
Fixture Mount Sensor (> 120 W fix.)				\$5.00	\$0.00	-

*Apply the total wattage of all controlled fixtures associated with total control quantity

**Apply hour reduction based on difference between hour used w/out controls & hours w/ control type

***Required Information. Must enter total project cost to determine rebate.

***Project Cost	
Total Rebate	\$ -

Specific Rules and Qualifications

The cooperative offers rebates to qualifying members who purchase and install qualifying energy-efficient LED lighting products. If the system configuration does not fit one of the prescriptive rebates shown, the project may still qualify for a rebate through the Custom Energy Rebate program. The Custom Energy Rebate requires review and approval by the participating member cooperative. Illuminating Engineering Society (IES) light levels are recommended.

- LED interior lamps and downlight luminaires/fixtures must be ENERGY STAR® or Design Lights Consortium (DLC) qualified. The lists of ENERGY STAR qualified products are available at energystar.gov/SSLPartners. Lamps are listed under the section "Partner Resources for LED Lamps". Luminaires/ fixtures are listed under "Partner Resources for LED Fixtures."
- The ENERGY STAR list of qualified luminaires includes a variety of products. In order to qualify for the prescriptive rebates for LED downlight luminaires/fixtures, the product must be listed as "Commercial" or "Both" in the "Application" column of the ENERGY STAR product list. In addition, the product description in the "Product Type" column must include the word "Downlight."
- ENERGY STAR does not have a qualified products list for LED canopy or soffit lighting or LED refrigerated case lighting (therefore, an ENERGY STAR rating is not required for those specific prescriptive rebates. See Design Lights Consortium for qualifying guidelines).
- For exterior LED canopy and soffit lights eligibility, the member must be replacing Metal Halide fixtures only. See Energy Star or DLC for qualifying specifications.
- Illuminating Engineering Society (IES) light levels are recommended.

Warranty Information

Rebate qualifications do not imply any representation or warranty of such equipment, design or installation by the cooperative. The cooperative shall not be responsible or liable for any personal injury or property damage caused by this equipment. The cooperative does not guarantee that a specific level of energy or cost savings will result from the implementation of energy conservation measures or the use of products funded under this program. In no event shall the cooperative be liable for any incidental or consequential damages.

Other Important Program Rules

1. Installation must be complete before rebate funds will be issued.
2. Members and vendors must submit itemized equipment invoices, along with rebate application and worksheet, to the cooperative. To ensure that the equipment installed meets the cooperative's performance standards, these invoices must itemize labor charges, quantity and price of the equipment installed, as well as information regarding the manufacturer and model numbers for all lamps, drivers and fixtures included in the rebate.
3. The cooperative reserves the right to conduct random inspections of installations.
4. The member is responsible for checking with the cooperative to determine whether funding is available and to verify program parameters.
5. Rebate must comply with all program specific rules and qualifications.
6. The maximum rebate amount shall be the lesser of 50 percent of the project cost or \$100,000.
7. Qualifying members must apply for 2014 rebates no later than November 14, 2014.
